

# Dendrobium atrovioleaceum

**Native of:** Eastern New Guinea islands.

**Habitat:** Epiphyte on large trees in rain forest at an elevation of 300-750m.

**Description:** An erect medium sized plant, carrying up to 20 very long lasting flowers. It flowers as a small plant.

**Cultivation Guidance:** At school we grow this species hot (min.18°C) through out the year in medium light. Some we grow in pots some we grow mounted.

**Flowering season:** most of the year

**Flask to flowering approx:** 3yrs.

**Seedling source:** Bob & Paddy Dadd
