

Laelia fidelensis

Native of: Brazil

Habitat: Discovered in the Sao Fidelis Mountains in the state of Rio de Janeiro.

Description: A small plant up to 30cm high with relatively large 8cm flowers with 1 to 4 flowers on a 10cm stalk.

Cultivation Guidance: At school we grow similar species cool (min10°C) in good light, in pots or mounted on bark. We keep them dryish during the winter. It's habitat suggests it could also grow warmer.

Flowering season: Early summer

Flask to flowering approx: 4yrs

Seedling source: Brazilian Nursery
