

# Ada aurantiaca

Native of: Colombia, Venezuela and Ecuador.

Description: A medium sized plant that produces arching 50cm spikes each with 5-15 striking 2.5cm flowers.

Cultivation guidance: At school we grow this species cool (min 10°C) and shaded in the summer. We keep plants moist throughout the year.

Flowing season: Spring.

Habitat: An epiphyte from wet forest between 2100m and 2300m altitude.
