

# Angraecum viguieri

**Native of:** Madagascar

**Habitat:** An epiphyte growing in bright light at around 900m

**Description:** Medium sized plant that produces large flowers up to 14cm across.

**Cultivation Guidance:** At school we grow similar species in pots up on a shelf to get good light or mounted. We grow plants warm (min 15°C).

**Flowering season:** Spring

**Flask to flowering approx.** 5yrs.

**Seedling source:** Kath Fairhurst
