

Cymbidium devonianum

Native of: Sikkim, India, Thailand

Habitat: High altitude 1500 to 2000 meters, The plants grow on trees rocks and steep banks in seasonally wet forest.

Description: A medium sized plant with 50cm leaves and up to 20 flowers on a pendulous spike. It can flower from both old and new pseudobulbs and makes an excellent specimen plant.

Cultivation Guidance: At school we grow this cool (min.10°C) wet in the summer dryish in winter. It is worth watching carefully for flower spikes and putting a label underneath them to help them over the edge of the pot before they grow downwards.

Flowering season: Spring

Flask to flowering approx: 4yrs.

Seed source: Writhlington
