

# Cymbidium tigrinum

**Native of:** Sikkim and Burma (plant above photographed in Sikkim)

**Habitat:** High altitude 1500 to 2700 meters, The plants grow on rocks and steep banks in seasonally wet forest.

**Description:** A real miniature cymbidium, the plant only grows 15cm high and produces up to 5 stunning scented flowers up to 8cm across on short spikes from older bulbs.

**Cultivation Guidance:** At school we grow this cool (min.10°C) wet in the summer dryish in winter. The plant looks similar to a cool growing Coelogyne and we grow this Cymbidium amongst our Coelogynes.

**Flowering season:** April and May

**Flask to flowering approx:** 4yrs.

**Seed source:** Writhlington
