

Lepanthopsis astrophora 'stalky'

Native of: Venezuela

Habitat: An epiphyte from coastal forest from 700 to 1500m

Description: A miniature plant with 1cm leaves and many 4mm flowers on stems clear of the leaves.

Cultivation Guidance: At school we grow this species cool (min 10°C), mounted on bark, and keep the plant moist all year round and well shaded in the summer.

Flowering season: Autumn and spring

Plant Source: Writhlington division
