

# Angraecum magdalenae

**Native of:** Madagascar

**Habitat:** Altitude 2000m on unshaded or lightly shaded quartzite boulders.

**Description:** Medium plant 1-5 very fleshy white flowers 2-3cm long.

**Cultivation Guidance:** At school we grow this warm (min.15°C) but other people grow it cooler to match its high altitude home. It needs to be grown in good light.

**Flowering season:** Summer

**Flask to flowering approx:** 4yrs.

**Seedling source:** Bob & Paddy Dadd
