

Cattleya fobesii

Native of: Brazil

Habitat: Growing on trees, rocks & shrubs near streams & on the seashore.

Description: Medium plant 2-5 flowered, flowers 10-12.5cm, sepals & petals pale green tinged purple brown lip pink with yellow in centre.

Cultivation Guidance: At school we grow similar species warm (min 15°C). Its natural habitat suggests it needs good light.

Flowering season: April-June

Flask to flowering approx: 4yrs.

Seedling source: Bob & Paddy dadd
