

Aerides houlettiana

Native of: South East Asia

Habitat: We have seen this epiphyte growing at around 900m altitude in Laos where the forest has a wet summer and a dryer winter.

Description: A medium sized plant with 20cm leaves and racemes of up to twenty 2.5cm flowers.

Cultivation Guidance: At school we grow similar species warm (min.15°C) and in baskets.

Flowering season Spring

Flask to flowering approx. 4-5years

Seedling source: Writhlington
